ACSF AND AVIATIONMANUALS OFFER ASAP SERVICES

Washington, DC March 21, 2018 – The Air Charter Safety Foundation (ACSF) and AviationManuals have been working together to offer the charter and business aviation industry an Aviation Safety Action Program (ASAP) that allows customers to combine the FAA/ACSF ASAP Memorandum of Understanding (MOU) with AviationManuals SMS data technology. Both ACSF and AviationManuals are pleased to announce they have reached an agreement.

"The goal is to provide end users with one-stop shopping by combining their overall safety management system with an ACSF-ASAP program," said ACSF president Bryan Burns. "It is through a cooperative effort and shared mission of safety, that the ACSF and AviationManuals have been able to bring this program to the marketplace through a single data source. Both entities believe this will be a win-win relationship for the charter and business aviation communities, as we work together to reduce operational risk and redundant workload associated with multiple databases," noted Burns.

"AviationManuals is excited to cooperate with the ACSF on their ASAP program," said AviationManuals president Mark Baier. "Through this agreement we can now offer operators the ability to participate in ASAP directly from within their ARC SMS software application. In keeping with our desire to simplify the customer experience, this relationship will decrease time and effort for charter & business aviation operators, without compromising their respective data and reports"

About Air Charter Safety Foundation

The vision of the ACSF is to promote and enable the highest levels of safety in personal, charter and business aviation. This goal will be achieved through:

1. Promotion and facilitation of risk management programs,
2. Advocacy for industry adoption of one common audit standard,
3. Dissemination of safety information and,
4. Creation of additional programs that advance the goals of the Foundation.
